

## Job Description

Position:	<b>Process Operator</b>
Company Name:	Eslinger Biodiesel, Inc (EBI)
Location:	Fresno, California
Salary:	\$30-\$36 per hour
Education Requirements:	Highschool diploma or equivalent

---

### BRIEF JOB SUMMARY

The Process Operator will be responsible for operating and maintaining the biodiesel production equipment and processes in the refinery. They will ensure that the production process is safe, efficient, and meets all environmental and quality standards. The ideal candidate will have a strong background in production equipment and processes, as well as familiarity with safety and environmental regulations. They will be highly motivated, detail-oriented, and possess good communication skills.

### ESSENTIAL DUTIES AND RESPONSIBILITIES

- **Operation of Equipment:** The Process Operator will be responsible for operating the production equipment in the refinery, including pumps, reactors, and separators, among others.
- **Process Control:** The Process Operator will be responsible for monitoring and controlling the production process to ensure that it meets quality and environmental standards. This includes measuring and adjusting process parameters, such as temperature, pressure, and flow rates.
- **Troubleshooting:** The Process Operator will be responsible for troubleshooting any production issues that arise, including equipment malfunctions and process deviations. They will work closely with the maintenance team to resolve any problems quickly and efficiently.
- **Safety and Environmental Compliance:** The Process Operator will be responsible for ensuring that all production activities comply with safety and environmental regulations. They will work closely with the safety and environmental teams to ensure that all procedures are followed correctly.
- **Quality Control:** The Process Operator will be responsible for monitoring the quality of the biodiesel produced and taking corrective actions if necessary to ensure that it meets all quality standards.

### EDUCATION and/or EXPERIENCE

- High school diploma or equivalent, with some college-level coursework in science or engineering preferred.

- 2-3 years of experience in a production or manufacturing environment, preferably in the biodiesel or energy industry.
- Knowledge of production equipment, processes, and systems, including pumps, reactors, and separators.
- Familiarity with safety and environmental regulations and compliance.
- Strong problem-solving skills and ability to troubleshoot production issues.
- Good communication skills and ability to work effectively in a team environment.
- Ability to work rotating shifts, including weekends and holidays.
- Physically able to lift up to 50 pounds and work in an industrial environment.
